studio

architecture  
in perfect  
harmony with  
wild nature

Hello, you are holding the business card of **acla** landscape architecture studio. Our mission is to create harmonious spaces where pristine wilderness and architectural structures coexist in perfect balance.

values

respect for nature,  
professionalism in work

Through our projects, we create spaces that invite people to connect with wild nature and live harmoniously amongst it.

We are a team of architects, landscape architects, engineers, designers, project managers, builders, talented gardeners, and visionaries. But above all, we are people committed to constructing sustainable, functional, and enduring ecosystems.

# services

84,204,060 m<sup>2</sup> is the total area of land we have planted and maintained over the years. Our portfolio includes over 52 projects carried out in five countries, including Moldova, Romania, Italy, France, and Tajikistan.

# space design

In our projects, design for the sake of design does not exist. Here, aesthetics complement functionality for a daily experience of satisfaction and comfort.

Each project follows a structured approach:

- Site analysis
- Exterior landscaping concept
- Conceptual Master Plan
- Detailed land design
- Street landscape design
- Infrastructure plans for pedestrians and cyclists
- Design of agroforestry protective shelterbelts
- Dendrological plan
- Irrigation network design
- Exterior lighting design
- 3D visualizations

# hardscape

Regardless of project complexity, our goal is to create a self-sustaining ecosystem that seamlessly integrates with the community.

Range of services offered:

- Hardscape project management
- Earthworks
- Drainage works
- Construction of pools and ponds ponds
- Landform shaping
- Pathway construction
- Exterior lighting installation
- Irrigation network installation
- Playground installation
- Green roof installation
- Garden and terrace shading systems
- Outdoor kitchens
- Garden fireplaces

# landscape development

We provide time-tested solutions that harmoniously integrate ecological, human, cultural, and aesthetic elements in an efficient and sustainable manner.

Your garden in a few steps:

- Project management
- Plant selection according to the project
- Land preparation
- Planting medium and large trees
- Planting ornamental shrubs in urban and private spaces
- Lawn establishment
- Green roof and terrace landscaping
- Soil mulching

# green space maintenance

Any green space requires a keen eye and skilled hands for upkeep. Our team offers maintenance services for residential, industrial, sports and community-managed green spaces.

We provide:

- Lawn maintenance
- Lawn renovation through overseeding
- Lawn mowing
- Plant fertilization
- Eco-friendly pest and disease control treatments
- Herbicide application
- Manual weed removal
- Tree pruning, shaping, and trimming
- Hedge formation
- Irrigation system maintenance

# projects

Every project we undertake is a tribute to the harmonious balance between humans and nature.

## residential spaces

Home is where people recharge, and we strive to ensure every home breathes—both literally and figuratively—through optimal space utilization.

With our team's vast experience and expertise, we skillfully integrate ecological, human, cultural, and aesthetic elements into spaces efficiently and sustainably.

# public spaces

We are proud to contribute to the creation of urban spaces designed for people, with nature in mind.

Landscaping and spatial design involve a meticulous planning and execution process. We approach every stage with dedication— from site analysis to concept development, customization, and ultimately, creating a functional and inspiring ecosystem where everyone feels welcome.
